Kuraray at K 2019

Sustainability and environmental protection are key topics for the plastics and rubber industries. Modern materials have to be produced sustainably and be biodegradable or recyclable. At the same time, they have to meet the high demands made by the industry. At K 2019 in Düsseldorf from October 16 to October 23 at booth D06 in hall 7a, Kuraray, one of the world's leading speciality chemicals producers, is presenting its extensive range of brands:

- The SEPTON™ BIO-series - A range of highly elastic bio-based TPE raw materials with very good flow ability and adhesion, good grip performance and better damping properties than conventional hydrogenated styrene block copolymers.

- EVAL™ - The new EVOH copolymer grades are even easier to recycle thanks to their low ethylene content and allow lower thicknesses. As packaging materials, they protect food optimally to prolong shelf life.

- PLANTIC™ - This biopolymer is 80 percent starch. Its outstanding oxygen barrier facilitates high-performance packaging that is completely biodegradable.

- MonoSol - This PVA film is biodegradable and dissolves completely in water. It can be used as a substitute for single-use plastic packaging in many applications to reduce plastic waste.

- CLARINO™ Suede - This sustainable, animal-friendly alternative to leather is produced using a particularly environment-friendly process without any animal-based products.

- MOWIFLEX™ - These water-soluble polyvinyl alcohols biodegrade within a short time in fresh water - a fact confirmed by TÜV Austria. They are suitable for environment-friendly applications from 3D printing to the lost-core process.

In addition, at K 2019, Kuraray’s experts will be providing information on the company's wide range of other high-performance materials such as CLARINO™, EVAL™, GENESTAR™, HYBRAR™, KURARITY™, MonoSol, MOWIFLEX™, Mowital™, PLANTIC™ and KURARAY POVAL™. Our experts will be very happy to answer your questions about our products, solutions and areas of application.

We are looking forward to your visit!
Your press contacts at K 2019

Your contact at the Kuraray booth at K 2019:
