Recycling Plastic

KAMADUR industrial knives supplies a wide range of standard and custom made knives for recycling of Plastics.

Our knives for recycling applications are made of the finest material. Depending upon application, knives are manufactured in different steel grades to improve productivity by reducing downtime, including D2, HSS, PM and TC.

Shredder blocks

Complete range of shredder blocks for single shaft shredders (flat or radius) also including stator knives, bolts, knife holders and cover plates. In material D2 (case hardened) and TC (solid and inlay).

Grinder knives

Grinder knives for the plastic recycling industry are made of the finest D2 material. Each blade is through hardened to ensure the finest molecular structure to achieve a longer lifetime. For even longer lifetimes, we offer knives with HSS, PM or TC inlay. We stock rotor, stator and deflector knives for many brands.

Shredder knives

We supply shredder knives for all multiple shaft shredders. Material and hardening according to customer specification. Knives including boss, as well as separate knives and spacers.

Pelletizer knives

Knives for all popular die face and underwater pelletizer equipment. Also available: compacter knives, holders and die faces.

Slow Speed Grinders

Rotors, stators and breaker knives for inline slow speed grinders. Many drawings available, custom production according samples. Coating with Tin for longer lifetime.

Knife holders and plates

Wear parts such as: Knife holders, clamping plates and dryer plates.

Knives for Erema[®], NGR[®], Artec[®]

Compacter knives, single and double bevel, also with TC inlay. Pelletizer knives, straight and fan style. Laserfilter scraper knives with and without holder. Complete programme available from stock in the Netherlands.

Scrapers/Meltfilters

We supply scrapers and filters for all popular brands.

Screens

KAMADUR industrial knives supplies custom made and standard screens for shredders, grinders, dryers and centrifuges. Standard range of material includes: Mild Steel, Mild Steel plus, LongLife and Genesis. Genesis has up to 10 times longer life-time vs Mild Steel.

Big bags

To complete our programme for the plastic recycling industry, we supply big bags for packing of shred, flakes and pellets.

U-panel/4-panel bags are the standard four loop bag with carrying capacity of 500 to 2000 kg. Baffle bags: FIBCs with baffles sewn inside the body, which help the bag to maintain the shape after filling.
