ROWALID®-MF
Polymer specific multifunctional masterbatches

FUNCTIONAL
- Color
- Combinable properties
- Additives
- Multifunctional

INDIVIDUAL
- Application specific
- By arrangement
- Polymer specific
- Conformity

VERSATILE
- Extrusion
- Injection molding
- Compounds
- Cast film

ROWALID®-MF
Polymer specific multifunctional masterbatches

MULTIFUNCTIONAL
With ROWALID®-MF, ROWA Masterbatch combines color and function in combination masterbatches. The products are multifunctional. There are no limits to the diversity and meeting nearly all customer requirements is possible. For example, RAL colorants can be combined with additives for laser marking, fluorescent colorants with antistatic agents, metal effect colorants with plagiarism protection, and infrared-reflecting colorants with lubricants. This modular system of color and function can be used to achieve your individual specification profile.

CUSTOMIZED
There is nothing off-the-shelf at ROWA Masterbatch. It is possible to find solutions for almost every thermoplastic resin. The advantages of polymer specific masterbatches are:

» optimum design of the technical properties
» no incompatibilities
» high resistances

The colorants are selected to match the application, such as

» Automotive   » Electronics
» Construction » Consumer

Special requirements and conformities, e.g. food contact, use in toys, etc., can be taken into account individually.

OPTIMALLY IMPLEMENTED
ROWALID®-MF Masterbatches are optimized for the intended processing method, e.g.:

» Extrusion   » Compounding
» Injection molding » Film extrusion

Combined: color & laser markability

Processing temperatures of thermoplastic resins
