

### Medical focus at MCAM Plastics NV

Next to injection moulding developments in automotive and industrial segments, MCAM Plastics has a focus on the joint development of medical devices, especially in manufacturing and assembly of large volumes of “over the counter” (OTC) applications.

MCAM Plastics NV in Tiel Belgium is certified ISO13485 for medical devices, FDA registered and is operating a fully equipped certified cleanroom ISO class 8 with 13 injection moulding machines. Also the assembly of the devices can be done fully automated in a cleanroom environment or HACCP environment. The activities include testing and final packaging and labelling.

The onsite tool shop and automation team complement and support the activities in the medical segment.
